

## WORKS AND FAITH OBJECT LESSON

Hello Moms,

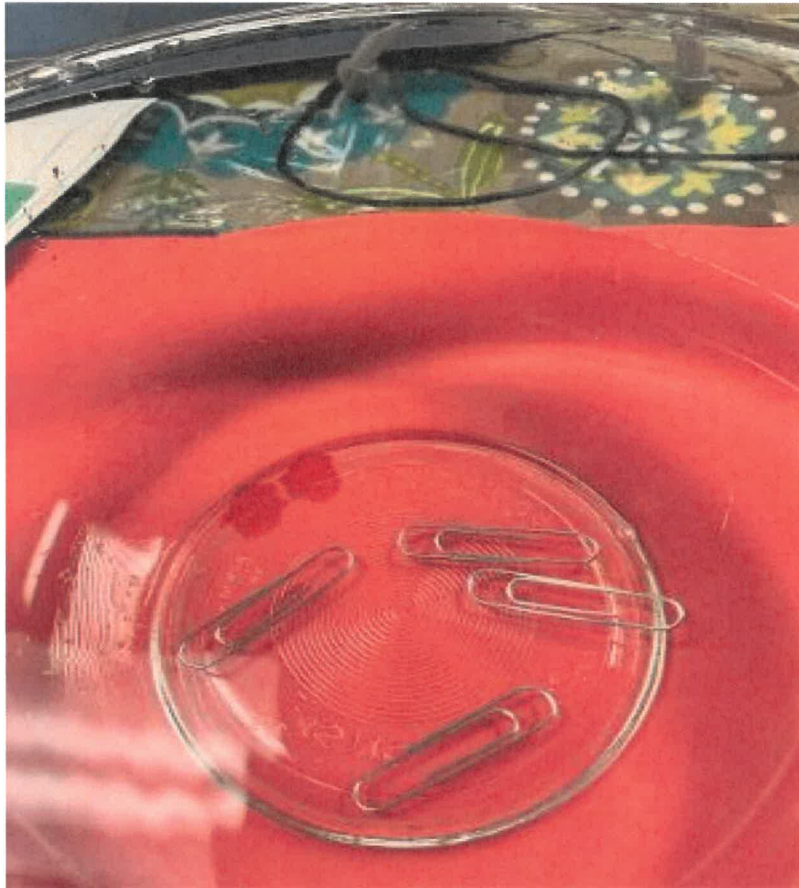

This Sunday I am doing an object lesson with the kids. You need a clear bowl filled with water, paper clips, and dish detergent. Practice ahead if you want to.

The idea is to drop a few paper clips into the water and watch them sink (Picture 1). This is walking by sight not by faith. Trusting your own works.

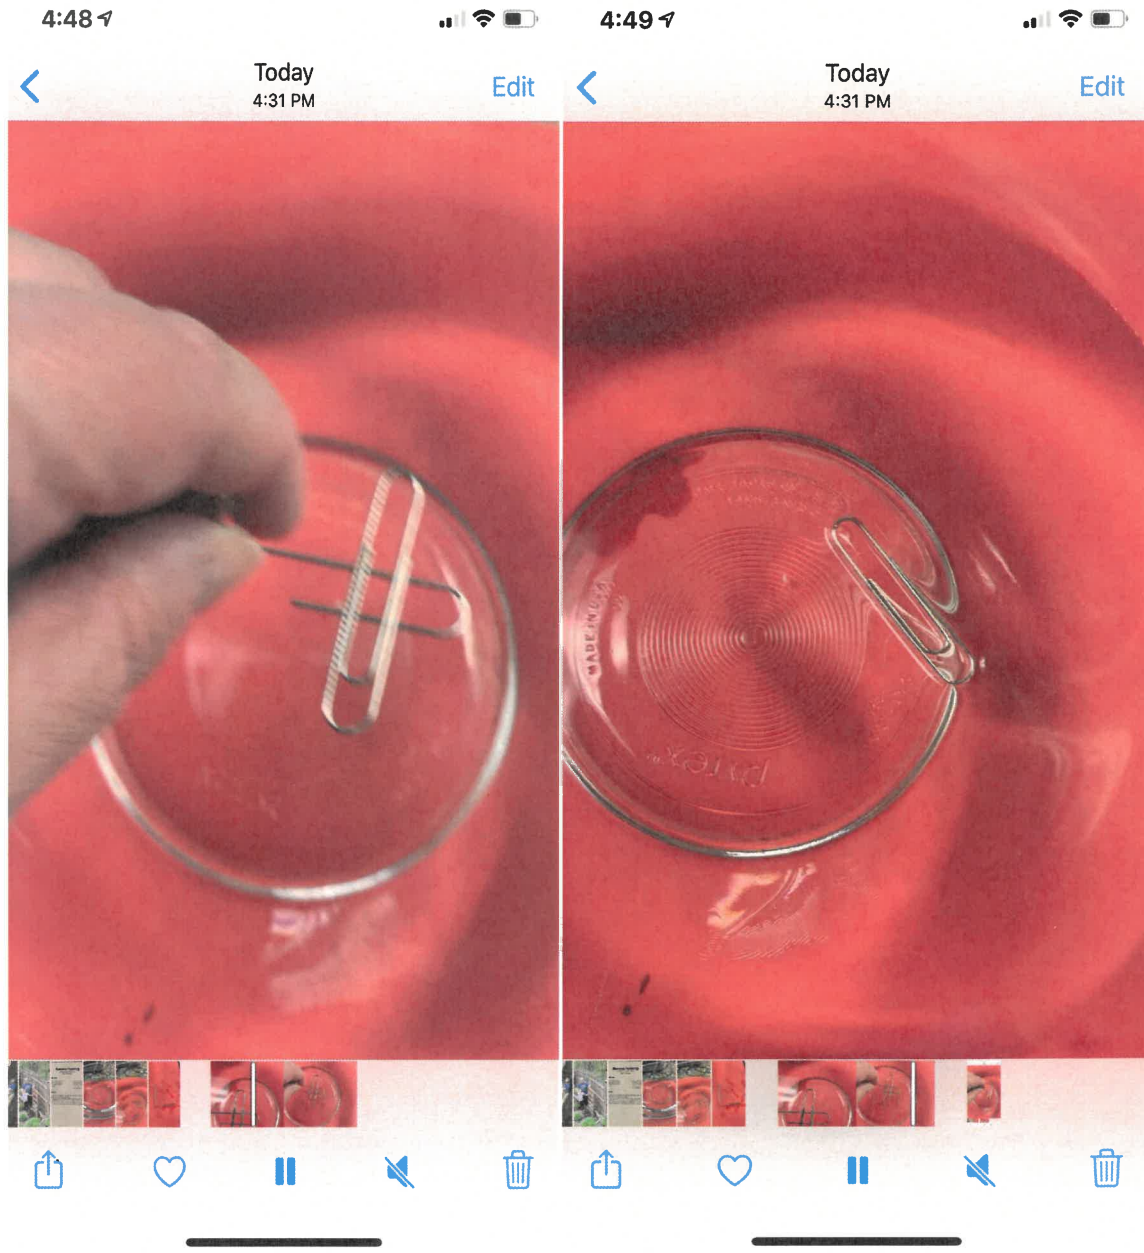

Then bend a paper clip out in a 90 degree angle. This represents Christ. Lay a paper clip across the bent one and slowly place it gently into the water. Pull the bent clip away from the other clip (Picture 2)

This paper clip will float (Picture 3). This represents trusting Christ and walking by faith. Do several of them.

Then take some dish soap and put a couple of drops in the water. Watch the floating paper clips sink. This is failing to walk by faith and now trusting In our works.
